CANDIDATE  
NUMBER

--	--	--	--

**0417/13**

October/November 2022

**2 hours**

You must answer on the question paper.

No additional materials are needed.

## INSTRUCTIONS

- Answer **all** questions.
- Use a black or dark blue pen.
- Write your name, centre number and candidate number in the boxes at the top of the page.
- Write your answer to each question in the space provided.
- Do **not** use an erasable pen or correction fluid.
- Do **not** write on any bar codes.
- You may use an HB pencil for any diagrams, graphs or rough working.

## INFORMATION

- The total mark for this paper is 100.
- The number of marks for each question or part question is shown in brackets [ ].
- No marks will be awarded for using brand names of software packages or hardware.

This document has **16** pages. Any blank pages are indicated.

- 1 Complete the following sentences using the most appropriate words from the list.

centred	a footer	a gutter	a header	indented
justified	landscape	an orphan	portrait	a widow

- (a) The orientation of a page that is taller than it is wide is called

..... [1]

- (b) An area at the bottom of a page is called

..... [1]

- (c) The first line of a paragraph that appears as the last line of the previous page is called

..... [1]

- (d) Text that is aligned horizontally in the middle of a line is called

..... [1]

- 2 A computer controlled glasshouse is used to grow plants.

State **three** sensors that could be used in the glasshouse.

1 .....

2 .....

3 .....

[3]

- 3 Circle **two** features of multimedia presentations which would **not** be found in a word processed document.

bullets	images	numbers	photographs
sound	tables	text	video

[2]

- 4 A person contacts an online medical website that uses an expert system to allow users to self-diagnose illnesses.

(a) Write down the component within the expert system that matches the definition given.

(i) This component contains a database of facts.

.....  
..... [1]

(ii) This component carries out the reasoning of the expert system.

.....  
..... [1]

(iii) This component allows the person to interact with the system.

.....  
..... [1]

(b) Describe how an expert system is used to diagnose an illness.

.....  
.....  
.....  
.....  
.....  
.....  
.....  
.....  
.....  
.....  
.....  
.....  
.....  
.....  
..... [6]

- 5 A restaurant uses a number of different types of software. These include control, measurement, spreadsheet and word processing software.

(a) Tick (✓) the most appropriate piece of software to carry out the tasks shown.

	<b>Control (✓)</b>	<b>Measurement (✓)</b>	<b>Spreadsheet (✓)</b>	<b>Word processing (✓)</b>
Producing menus for the restaurant				
Calculating the cost of each of the meals				
Automatically turning on the fans when the room gets too hot				
Monitoring the temperature in the restaurant				

[4]

The restaurant owner is planning to upgrade the software used to book reservations. He has employed a systems analyst who is analysing the current system. The systems analyst can either send out questionnaires for staff to answer or observe staff working with the current system.

- (b) Discuss the advantages and disadvantages of using questionnaires that staff answer rather than observing staff to gather information about the current system.

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

[6]

**6** A web page can contain images saved as png or gif file types.

**(a)** State what is meant by png and gif file types.

png .....

.....

gif .....

.....

[2]

**(b)** Explain the differences between the two file types.

.....

.....

.....

.....

.....

.....

[3]

- 7 A school librarian is setting up a database of all the revision books he has in stock. The school library sells revision books to students. The books range in value from \$1 to \$10 and are available either in electronic book type (E) or physical book type (P).

- (a) The librarian is planning to set up a number of different types of validation rule for the fields to check data entry. Write down the most appropriate field name from the table that could be used with each of the validation rules. Your answers must be different in each case.

Name_of_book	Department	ISBN	Book_type	Cost
Modern History	HIS	0140621393432	P	\$5.20
GCSE ICT	ICT	0006132237	E	\$1
A Level Calculus	MAT	0006153516	E	\$1
Human Biology	SCI	0006511376	E	\$2.30

Presence .....

Lookup .....

Range .....

Length .....

[4]

The librarian needs to set up a primary key field.

- (b) Write down the most appropriate field name from the table that could be used as a primary key field.

..... [1]

Most of the revision books are available in electronic book type as digital versions of the printed books. These are stored as interactive PDF files.

(c) Describe the benefits and drawbacks of using the digital versions.

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

[6]

- (a) Discuss the effectiveness of using a handprint to enter the building rather than keying in a code.

This image shows a full page of white paper with horizontal ruling lines. The lines are evenly spaced and extend across the width of the page, typical of notebook or legal stationery. There are no margins, text, or other markings on the page.

[8]

Handprint scans are an example of a biometric method to enter a building.

- (b)** Give **two** other examples of biometric methods that could be used in this scenario.

1 .....

2 .....

[2]

- 9** The use of email has replaced many forms of communication.

Describe the constraints that you need to consider when writing and sending an email.

This image shows a full page of white paper with horizontal dashed lines, typical of primary school handwriting practice paper. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

- 10 (a)** For each of the following types of backing storage give **one** example of its associated media. Your answers must be different in each case.

Optical .....

.....

Magnetic .....

.....

Solid state .....

.....

[6]

[3]

(b) Describe **three** differences between optical and magnetic backing storage.

- 1 .....
- .....
- 2 .....
- .....
- 3 .....
- .....

[3]

11 A student is carrying out some research for school.

(a) Explain **two** ways she could search for information on the World Wide Web (WWW).

- 1 .....
- .....
- 2 .....
- .....

[2]

(b) Explain the differences between the internet and the World Wide Web (WWW).

- .....
- .....
- .....
- .....
- .....
- .....
- .....
- .....

[4]

- 12** The internet contains three web development layers. One layer is the content layer. This layer is used to enter the content of a web page structure.

**(a)** Name and describe the other **two** web development layers.

Layer .....

Description .....

.....

Layer .....

Description .....

.....

[4]

**(b)** Explain why tables can be used to structure elements within a web page.

.....

.....

.....

.....

.....

.....

[3]

- 13** A teacher is concerned that students are playing online computer games at home without considering eSafety. The teacher is going to create a set of rules that he feels they should be following.

Write down a list of eSafety rules that he could include.

This image shows a full page of white paper with horizontal dashed lines, typical of primary school handwriting practice paper. The lines are evenly spaced and run across the entire width of the page. There are no margins, text, or other markings present.

[6]

- 14** Explain why page, section and column breaks are used in documents.

[illegible]

[3]

- (a) Discuss **two** different methods she could use to transfer this work to the office. Include in your answer the advantages and disadvantages of each method.

[illegible]

[6]

- (b)** Describe what is meant by the term encryption and why it is used.

[illegible]

[3]

(c) Tick (✓) the most appropriate working pattern to match the following statements.

	<b>Compressed hours (✓)</b>	<b>Flexible hours (✓)</b>	<b>Job sharing (✓)</b>	<b>Part-time working (✓)</b>
An employee works a full day but negotiates with the employer the start and end times				
An employee works the same number of hours as a full week but in fewer days				
An employee works for fewer hours than a full-time employee				

[3]

Paper 1 Theory

**October/November 2022**

**MARK SCHEME**

Maximum Mark: 100

---

<p><b>Published</b></p>
-------------------------

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the October/November 2022 series for most Cambridge IGCSE™, Cambridge International A and AS Level components and some Cambridge O Level components.

---

This document consists of **9** printed pages.

**Generic Marking Principles**

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

**GENERIC MARKING PRINCIPLE 1:**

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

**GENERIC MARKING PRINCIPLE 2:**

Marks awarded are always **whole marks** (not half marks, or other fractions).

**GENERIC MARKING PRINCIPLE 3:**

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

**GENERIC MARKING PRINCIPLE 4:**

Rules must be applied consistently, e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

**GENERIC MARKING PRINCIPLE 5:**

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

**GENERIC MARKING PRINCIPLE 6:**

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.
